PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4 years of experience in React, Node.js, and PostgreSQL. Skilled in building scalable, real-time applications. Experienced Module Lead, mentoring developers and driving Agile delivery with clean architecture and high performance.

PROFESSIONAL EXPERIENCE

Sonicbolt Technologies LLP — Nov 2021 - Current

Full-Stack Software Engineer - Module Lead

- Architected and delivered enterprise-scale web applications using **React, TypeScript, Node.js, Express.js, and PostgreSQL**, ensuring scalability, maintainability, and clean code architecture across multiple modules.
- Designed and optimized backend architecture, implementing scalable REST APIs and database strategies that **improved query performance by ~30%** and increased system reliability under heavy workloads.
- Developed real-time features with **WebSocket, SSE, and Socket.io**, enabling live data updates, progress tracking, and instant system notifications that enhanced user experience.
- **Built a reusable UI component library** (tables, filters, dashboards, import/export tools) adopted across multiple applications, reducing development time and ensuring consistency in design and functionality.
- Ensured robust data modeling and contributed to solution, data, and technical architecture decisions for mission-critical applications.
- Prioritized performance and security, implementing best practices and safeguards across the full stack to maintain stability and protect user data.
- Conducted load and performance testing with JMeter, validating application stability, throughput, and fault tolerance under high concurrency scenarios.
- **Mentored 3 junior developers and 4 QA testers**, conducted code reviews, and established coding standards — improving code quality, testing efficiency, and overall team productivity.
- **Led Agile sprints with Jira**, driving backlog grooming, sprint planning, and structured execution that improved delivery speed and cross-team collaboration.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript, three.js, Redux, Tailwind CSS, CSS/SCSS, and HTML5
Backend: Node.js, Express.js, WebSockets, Socket.io, REST API, JWT Authentication, Redis
Database: PostgreSQL, MySQL, Data Modelling
Testing & QA: JMeter, Postman, Lighthouse, Jest
DevOps & Tools: Docker, Git/GitHub, and Jira

EDUCATION

Assam Don Bosco University — June 2017-July 2021

Bachelor of Technology - Computer Science and Engineering
